

## Outsourced Business Continuity

When things do go wrong, you need to know that you can recover quickly and effectively.

By outsourcing your business continuity to a trusted outsourced IT partner, you will be sure that your business has the robust business continuity plans that you need in place and that those plans are extensively and regularly tested to ensure that are fit for purpose.

By outsourcing your business continuity function to an organisation that is geared to help, you can rest easy knowing that you have a plan in place in the event of a serious failure or disaster, such as a security breach, data corruption or even a force majeure.

We will work with you to implement and then test your business continuity plan. One that meets your business needs and is proven to be robust.

Decrease your risk, reduce your costs and protect your brand reputation by connecting your infrastructure to a secure, trusted off-site platform, ready to be powered on when needed.

We can provide you with:

- ✧ Cold standby equipment in safe storage.
- ✧ Warm backups that can be livened up quickly.
- ✧ Hot, instantly available services.

## Outsourced Business Continuity Benefits

### ✓ Mission-critical application and data protection.

With an outsourced business continuity service, you can rest easy knowing that you have a compliant and fully tested solution that will allow you to live up a service to keep your team and business operational and generating revenue when disaster strikes.

### ✓ Scale as and when you need to with fully flexible business continuity services.

Your business continuity plan needs to be able to flex and change as your business and your requirements change. By outsourcing your business continuity to a trusted IT services partner with a team of specialist business continuity experts, you know that adapting to your needs will not be an issue.

### ✓ Reduced expenditure and improved operational efficiency.

Keeping a business continuity plan up-to-date and fully tested is a time-consuming, lengthy and costly process. By outsourcing that element of your IT, you can redeploy your resources, confident in the knowledge that you are being looked after by business continuity specialists.

### ✓ Outsourced disaster recovery services that meets your specific recovery point and recovery time objectives.

You may have some services and data that you cannot afford to be unavailable for any length of time, but others that you could survive not having access to for a defined period of time. By outsourcing your business continuity service, you have the flexibility to specify your own recovery point and time objectives and build a solution that suits your business.

Outsource your business continuity to a proven technology service partner.

Our experienced technical team are here when you need us, 24x7x365.
